XProtect® Corporate
Advanced Video Surveillance for 24/7 Mission Critical Operations

XProtect Corporate is IP video management software (VMS) designed for large-scale and high-security installations that require continuous access to video.

It ensures end-to-end protection of video integrity while maximizing hardware performance. Central management, built-in video wall and support for failover recording servers make it ideal for mission-critical installations such as airports and cities.

Reliable
24/7 peace of mind

Designed by video surveillance experts to provide you with the industry's most reliable recording engine for boosting the performance of your hardware, with support for Edge Storage and failover servers for continuous and uninterrupted access to video.

Customizable
Our software, your solution

Expand the capabilities of your system to fit your organization's needs with dozens of verified leading solutions securely integrated using the open platform SDK architecture.

Scalable
Software built for today and tomorrow

Support for unrestricted number of servers, cameras and users provides efficient central management of systems in all sizes using Milestone's open platform.

User-friendly
Advanced system, simple use

Built-in video wall solution, centralized search platform and multi-layer maps assure visualized situational awareness, intuitive camera navigation and efficient collaboration when responding to incidents.

Secure
Security you can count on

Reinforce your system's resilience to cyber security threats without compromising people's privacy with a GDPR-ready certified VMS and an array of built-in security and privacy tools.

High Availability System

Central and single-point administration of all system components and settings.

Failover servers act as a backup to primary recording and event servers and may be clustered for high-availability.

Integrated flexible and hardware independent video wall included for supreme situational awareness.

XProtect Smart Wall • Management Client • XProtect Smart Client • XProtect Web Client • XProtect Mobile • Mobile Server • SQL Server • Event Server • Cluster • Fallover Event Server • Management Server • Cluster • Fallover management Server • Recording Server • Fallover Recording Server

HIGHLIGHTED FEATURES

Hardware Acceleration
Support for NVIDIA© and Intel© hardware-accelerated video decoding for unparalleled performance, reduced CPU loads and lower system costs.

Edge Storage and Failover Servers
Support for Edge Storage recordings and Failover Servers for uninterrupted access to video, even during system failures and maintenance downtime.

Push Notifications
Proactive online system health monitoring for uninterrupted business operations and quick response when something in the system requires your attention.

MIP SDK
XProtect's open architecture and MIP SDK, provide unlimited expandability of your system.

Metadata
Augment your video by adding metadata, such as GPS coordinates, motion data, and facial recognition from smart and IoT devices.

Milestone Marketplace
Get direct access to dozens of verified products that push video beyond security.

H.265
Reduce the cost of video storage by using the latest H.265 compression technology.

Unrestricted
Support for an unrestricted number of servers, cameras and users for easy scalability and maximized flexibility.

Milestone Federated Architecture
Connect an unrestricted number of XProtect Corporate and XProtect Expert sites in a parent/child hierarchy for unlimited scalability.

Central Management
Centrally manage multiple sites with XProtect Corporate as a central hub using Milestone Interconnect as a cost-efficient solution for distributed operation.

XProtect Smart Wall
Built-in video wall solution for immersive visualized situational awareness and efficient response coordination.

Multi-Layer Maps
For quick navigation between buildings and floors and visual overview of installations in every size.

Alarm Manager
Built-in Alarm Manager for a consolidated overview of security and system alarms, immediate visual verification and efficient investigation.

Video Bookmarking
Bookmark video sequences of special interest while watching live or playback video for efficient video investigations.

Centralized Search
Search for video, motion, alarms, events and bookmarks all in one place and save your search templates for quick future investigations.

Rule Engine
Automate standard security functions with a built-in Rule Engine and increase operational efficiency by minimizing the need for manual intervention.

Audio
Add audio to video with one/two-way audio support in the Smart, Web and Mobile clients.

User Access Management
Close monitoring of user access rights and efficient management of multi-user installations.

Dual Authentication
An additional level of security for granting user access to viewing interfaces.

Secure Export
Additional encryption, digital signing and re-export prevention for ensuring exported material is 100% authentic.

Encryption
Dual-end certificate-based encryption between recording servers and all other system components.
